

I'M LEARNING ABOUT

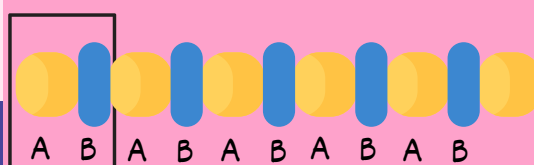

PATTERNS

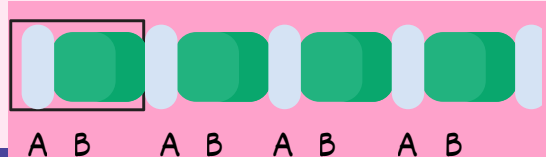

IDENTIFYING PATTERNS

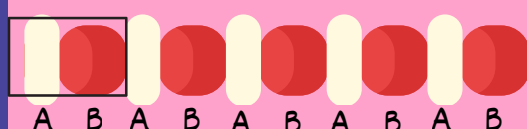

I am learning how to Identify a simple AB repeating pattern. My goal by the end of the year is to identify and extend simple AB repeating patterns.

"I see the AB pattern with the beads! yellow bead, blue bead, yellow bead, blue bead - the pattern repeats each time!"

"I see the AB pattern with the beads! blue bead, green bead, blue bead, green bead - the pattern repeats each time - I can make an AB pattern with different beads!"

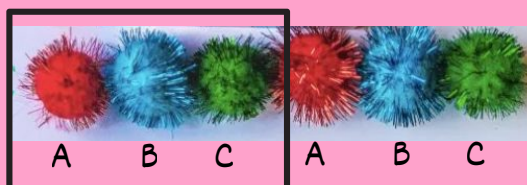

DUPLICATING PATTERNS

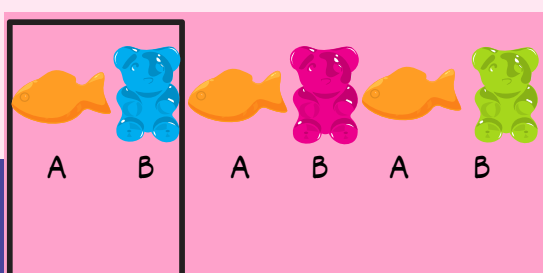

I am learning how to duplicate an AB pattern with different objects. My goal by the end of the year is to be able to duplicate an AB pattern with different objects.

COMPLEX PATTERNS

I am learning how to recognize the repeating part of a more complex pattern. My goal by the end of the year is to be able to recognize the repeating unit of more complex patterns and be able to extend the pattern (ex: ABB or ABC).

"I see the ABC repeating pattern. The pattern is red, blue, green. Then the pattern starts over again."

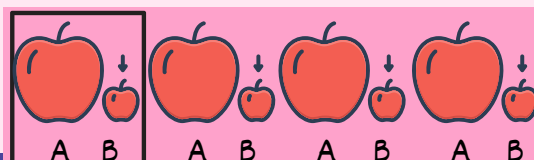

"We made an AB pattern with our snack, can you tell us what the pattern is?"

PATTERNS AT HOME

Help me practice identifying (recognizing) and duplicating (creating with other materials) AB patterns. We can make patterns out of so many things - food, toys, colors, people, etc.

QUESTIONS TO ASK ME

"I see the AB pattern with the apples: big apple, little apple, big apple, little apple - the pattern repeats each time - I can make an AB pattern with different objects!"

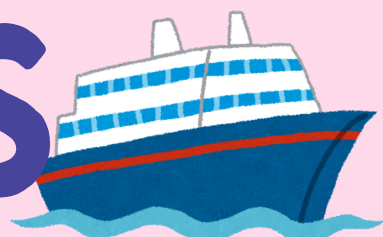

- I made a pattern - can you tell me what the pattern is?
- Can you create the same color pattern, but with different objects?
- Look, I made a pattern, can you tell me what kind of pattern I made?
- Can you make a pattern for me and I can try to figure out what your pattern is?

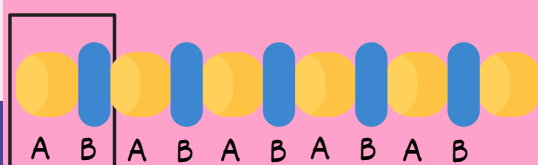

ESTOY APRENDIENDO SOBRE

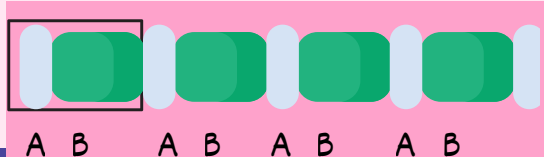

PATRONES

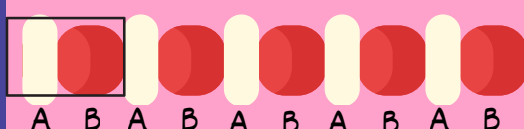

IDENTIFICACIÓN DE PATRONES

"¡Veo el patrón AB con las cuentas! Cuenta amarilla, cuenta azul, cuenta amarilla, cuenta azul: ¡el patrón se repite cada vez!"

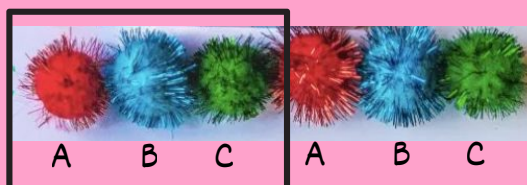

"¡Veo el patrón AB con las cuentas! cuenta azul, cuenta verde, cuenta azul, cuenta verde: el patrón se repite cada vez, ¡puedo hacer un patrón AB con diferentes cuentas!"

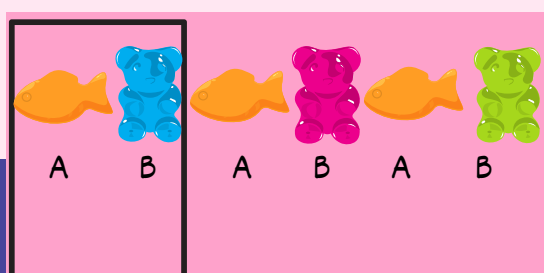

DUPLICANDO PATRONES

Estoy aprendiendo a duplicar un patrón AB con diferentes objetos. Mi objetivo para el final del año es poder duplicar un patrón AB con diferentes objetos.

PATRONES COMPLEJOS

"Veo que el ABC repite el patrón. El patrón es rojo, azul, verde. Entonces el patrón comienza de nuevo."

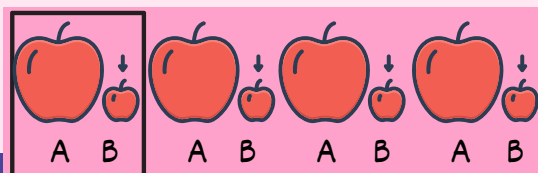

"Hicimos un patrón AB con nuestro refrigerio, ¿puedes decirnos cuál es el patrón?"

PATRONES EN LA CASA

Ayúdame a practicar la identificación (reconocimiento) y la duplicación (creación con otros materiales) de patrones AB. Podemos hacer patrones de tantas cosas: comida, juguetes, colores, personas, etc.

PREGUNTAS PARA HACERME EN CASA

"Veo el patrón AB con las manzanas: manzana grande, manzana pequeña, manzana grande, manzana pequeña, el patrón se repite cada vez, ¡puedo hacer un patrón AB con diferentes objetos!"
